

TIER 3 PUBLIC NOTICE

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Valle Escondido DWID

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards.

During September 2021 we did not complete all monitoring or testing.

For DBP2 and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year; how often we are supposed to sample and how many samples we are supposed to take; how many samples we took; when samples should have been taken; and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were taken
DBP2	1 sample every 3 years	0	Sept 2021	N/A

What is being done?

We will be sampling for DBP2 for this monitoring period November 2021. We will also be taking samples next year September 2022.

For more information, please contact Gilbert Sanchez at 520-251-1896 or PO Box 209 Maricopa AZ, 85138
